

Department of Biochemistry

BCH 100

An Introduction to Biochemistry

Are you considering a major change in Biochemistry?

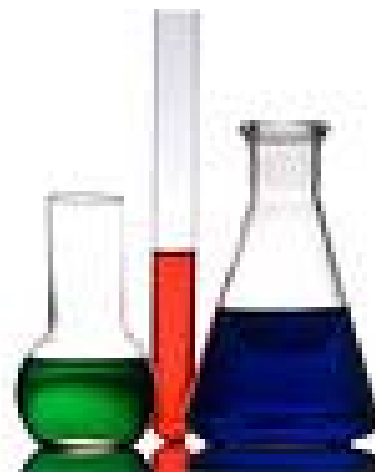

Would you like to lighten your academic year course load by completing upper division or biochemistry science requirements during the summer?

Summer Session BCH 100 might be the class for you

Elementary Biochemistry (4)

Lecture, 3 hours; discussion, 1 hour

BCH 100 is an introduction to the chemistry and molecular biology of living organisms based on a study of the structure, function, and metabolism of small molecules and macromolecules of biological significance.

June 22nd - August 29th

Lecture #11863

Discussion #11864
