

Department of Botany & Plant Sciences

250 Seminar Series – Spring 2014

Wednesdays from 4:10 - 5:00 PM, Genomics Auditorium

Date	Speaker	Title
April 2	Jennifer Fletcher University of California, Berkeley	Chromatin-mediated regulation of Arabidopsis meristem and fruit development
April 9	Juan Pablo Giraldo University of California, Riverside	A Nanobionic Approach to Augment Plant Photosynthesis and Biochemical Sensing
April 16	Dr. Tom Gillespie University of California, Los Angeles	World's Most Endangered Forest
April 23	Yasmin Bektas University of California, Riverside	Synthetic elicitors as specific molecular probes targeting plant defense signaling and leads for the development of novel reduced-risk pesticides.
April 30	Herun Bektas University of California, Riverside	TBA
May 7	Justin Valliere University of California, Riverside	The effects of nitrogen deposition on coastal sage scrub invasion and reestablishment
May 14	Yi-Yun Chao University of California, Riverside	Alternate bearing in olive (<i>Olea europaea</i> L.)
May 21	Dr. Etienne Rabe Paramount Citrus	The California Citrus Industry: <i>Meeting the challenge of staying competitive</i>
May 28	Ben Wilder University of California, Riverside	Historical Biogeography of Islands in the Gulf of California, Mexico.
June 4	Alejandra Martinez University of California, Riverside	Rainfall variability in deserts and the timing of seed release in <i>Chorizanthe rigida</i> , a serotinous winter annual

Instructor: Darrel Jenerette (951) 827-7113
