

Department of Botany & Plant Sciences

250 Seminar Series – Fall 2013

Wednesdays from 4:10 - 5:00 PM, Genomics Auditorium

Date	Speaker	Title
Oct 2	Jennifer Fletcher University of California, Berkeley	Chromatin-mediated regulation of Arabidopsis meristem and gynoecium development"
Oct 9	Zhigang Wu University of California, Riverside	Comparative analysis of stress associated miRNAs in maize and sorghum
Oct 16	Nola Ung University of California, Riverside	Quantifying Endomembrane Dynamics Using Chemical Genomics and Video Bioinformatics
Oct 23	Jessica Lor University of California, Riverside	Function of TPPI and TPPJ in Arabidopsis Boundary Region
Oct 30	Jin Yao University of California, Riverside	TBA
Nov 6	Kun Liu University of California, Riverside	Elucidating the mechanism underlying transposition of <i>Mut1</i> transposable element from <i>Aedes aegypti</i>
Nov 13	Tyler Mock University of California, Riverside	Management and Genetic Variability of Turf-Type Kikuyugrass (<i>Pennisetum clandestinum</i> Hochst. Ex Chiov
Nov 20	James Peng	Thesis defense : Characterization of the role of <i>S1SERKs</i> in plant defense against root-knot nematodes, potato aphids and <i>Pseudomonas syringae</i> pv. tomato
Nov 27	Shana Welles University of California, Riverside	Evolutionary origins of <i>Salsola ryanii</i> a novel allopolyploid weed.
Dec 4	BPSC 200A University of California, Riverside	

Instructor: Venu Reddy (951) 827-3482
