

Botany & Plant Sciences
260 Seminar Series – Winter 2010
Weds. 4:10 p.m. - 5:00 p.m. STAT B650
(Light refreshments served from 3:40-4:00 in BH Lobby)

January 6	Frank Ewers, Cal State Pomona “Wood structure and function: From ecosystems to molecules and from seedlings to adults”
January 13	Peter Chesson, University of Arizona “Quantifying and testing species coexistence mechanisms in plant communities”
January 20	Rens Voesenek, Utrecht University “Ecophysiology of flooding tolerance in both wild and model plant species”
January 27	Elizabeth Waters, Cal State San Diego “Genomic and Evolutionary Studies of Thermotolerance”
February 3	Stephen Weller, UC Irvine “Three’s a crowd: incompatibility relationships and mixed mating in a heterostylous species”
February 10	Sean Cutler, UCR- Botany and Plant Sciences TBA
February 17	Scott Hodges, UC Santa Barbara “Floral variation in <i>Aquilegia</i> : from field studies to genomic analysis”
February 24	Orly Alter, University of Texas, Austin “Discovery of mechanisms from mathematical modeling of DNA microarray data: Computational Prediction and experimental verification”
March 3	Ann M. Bartuska, US Forest Service TBA
March 10	Diane Elam, US Fish and Wildlife TBA
